Tresenteret | Trondheim, Høgskoleringen 6B, 7491 TRONDHEIM

During the Gluelam study tour we visited TreSenteret and had an interesting presentation by Prof. Harald Landrø, assisted by Mari Oline Stendebakken.

TreSenteret is an initiative to increase the knowledge and use of wood in cooperation between the Norwegian timber industries and the Norwegian University of Technology and Science (NTNU) in Trondheim.

TreSenteret (The Timber Centre) is one of the members of a coordinated structure of organisations in the Norwegian timber industries, together with TreFokus (Timber Focus – timber promotion), Treteknisk (The Norwegian Wood Technology Institute – research/testing/certification etc.), ByggSkolen (The Building School – teaching operators in the building industry) and Treindustrien (The Sawmill Industry – taking care of the industry's contact with the authorities, with labour unions etc.)
